	Third Friday of the Month
17th November 2023 Speaker Phil Cox	"The Newport Medieval Ship " The Newport Medieval Ship is a fifteenth century merchant vessel unearthed in the heart of Newport in 2002. The ship was a formidable three-masted craft measuring over 30 metres in length and capable of carrying around 200 tons of cargo. Examination of the artefacts and remains found on board suggests that the ship probably sailed between Lisbon and Bristol. Phil Cox, one of our new members, will tell the inside story of this significant project and the aspirations of the project team and the supporting charity, the Friends of Newport Ship.
